

What to know about your health insurance

Shay
Catheter user

Do you know what is covered by your insurance provider?

Navigating through your health insurance may feel overwhelming, but as a Comfort Medical customer, you don't have to figure it out alone. We have the most up-to-date Medicare Guidelines for intermittent catheters so you can feel confident in our support of your situation.

We also communicate directly with insurance providers to determine your coverage.

Catheter supplies covered by insurance

Depending on your insurance, the cost of your supplies may be covered completely.

How it works:

Medicare and most **private insurers** generally pay 80% of the cost of supplies for qualified beneficiaries after any annual deductibles have been met.

If you have **supplemental insurance**, you may be covered for the remaining portion. This means that your supplies are no cost to you. However, you will be responsible for any portion (co-pay or deductible) that is not covered by your insurance.
